With Honors Santa Isabel College of Manila Senior High School Average of 92	2022

Experience

DISD Intern, Project Manager/Full-Stack Developer Microgenesis Business Systems Mandaluyong, Philippines	Dec 2025 – April 2026
• Able to lead and manage a team of 16 interns across 7 active projects by assigning tasks, monitoring progress, and ensuring efficient distribution of workloads while also contributing as a Full-Stack Developer. • Able to actively develop and enhance enterprise systems such as BTrConnect (HCM) and OneOps (TMS), implementing both frontend and backend functionalities aligned with business requirements. • Able to oversee multiple project streams including Microgenesis Central Hub (Web & Mobile), delegating development tasks to team members while ensuring continuity, quality, and timely delivery. • Able to successfully complete and deliver the Asset Sync project assigned by Sir Chris, and properly transition the project to an employee for continued maintenance and operations. • Able to demonstrate strong leadership, adaptability, and collaboration by handling both technical and managerial responsibilities while working with different departments and stakeholders. • Projects: BTrConnect OneOps Asset Sync Microgenesis Central Hub Website & Mobile Support Entitlement Chronos	
Freelance Web & Mobile Developer Self Employed Philippines	Feb 2026 – Present
• Able to independently source and manage clients, primarily supporting capstone projects for BSIT students, delivering full-stack web and mobile solutions from planning to deployment.	

- Able to successfully design, develop, and deploy **TailWatch – Pet Management System (Web Application)** for a client from National University – MOA, collaborating with stakeholders from Biyaya Animal Sanctuary and The Biyaya Animal Care Foundation in Cavite. Implemented a modern full-stack architecture using Next.js, Tailwind CSS, TypeScript, Node.js/Express, and MongoDB Atlas, with deployment via Vercel and Render, including custom domain integration through Hostinger. Integrated an AI-powered chatbot using Gemini to enhance user interaction and support features.
- Able to successfully design, develop, and deploy, **I-Track – Isuzu Vehicle Service Management System (Web & Mobile Application)**, delivering a full-stack solution for a BSIT client from National University – MOA in partnership with Isuzu Pasig. Built the web platform using Next.js, Tailwind CSS, and TypeScript, and the mobile application using React Native with Expo. Developed backend services with Node.js/Express and utilized MongoDB Atlas for cloud database management. Deployed systems via Vercel, Render, and Namecheap domain services. Implemented real-time driver tracking using Google Maps integration and enhanced system capabilities with AI-driven analytics.
- Able to demonstrate strong client communication, project ownership, and technical versatility by handling end-to-end development, deployment, and post-delivery support across multiple platforms.

Capstone Project Manager & Full-Stack Developer | Capstone | National University – Mall of Asia

Nov 2024 – Oct 2025

- iBayanihub: A Mobile and Web Application for Promoting Volunteerism and Managing Charity Works in Urban Communities for Caritas Manila
- Able to lead the development team by managing tasks, timelines, and collaboration among members, ensuring smooth project execution and on-time delivery of outputs.
- Able to design the UI/UX of both mobile and web applications by creating wireframes, interactive prototypes, and polished visual interfaces that enhanced user engagement and aligned with the platform's mission.
- Able to develop responsive and scalable front-end components using React and React Native, ensuring a seamless cross-platform user experience across devices.
- Able to build and implement a full-featured volunteerism and donation platform for Caritas Manila, enabling users to register for events, donate (cash or in-kind), and actively engage with community initiatives through both web and mobile platforms.
- Project Link: <https://ibayanihub.site/login>
Tech Stack: React, React Native, CSS, Javascript, Expo, Node/Express JS, MongoDB Atlas, Vercel, Render & Namecheap (Domain)

Technical Committee | The Silicon Assembly - NU MOA I.T Student Council | National University – Mall of Asia

July 2024 – July 2025

- Able to provide technical support during organization events and seminars, including the setup and troubleshooting of audio-visual equipment and computer systems.
- Able to collaborate with event organizers to ensure smooth technical operations while assisting in the logistics and preparation of technical requirements.

SIDE PROJECTS

Personal Portfolio Website (Web Application) | Frontend Developer

- Designed and developed a personal portfolio website to showcase projects, technical skills, and professional experience through a clean and modern interface.
- Implemented responsive design and intuitive navigation to ensure optimal user experience across desktop and mobile devices.
- Integrated dynamic project displays and structured content presentation to effectively highlight development work and achievements.
- Check At: <https://pmalonzo-portfolio.vercel.app/>
Tech Stack: Next JS, Tailwind CSS, ShadCN UI & TypeScript

Pwinstone (Web Application) | Solo School Project | Frontend Developer

Designed and developed a promotional website for a guitar parts shop and guitar repair service, showcasing available products, repair offerings, and contact information through a clean and visually appealing layout.

Strengthened the shop's online presence by implementing user-friendly navigation, responsive design, and engaging visuals to effectively highlight its products and services to customers.

Check At: <https://pwinstone.vercel.app/>

Tech Stack: React JS & Tailwind CSS

WorkLoom (Web Application) | Group School Project | Leader & Full-Stack Developer

Developed a job finder platform with full CRUD functionality, integrating React for dynamic front-end features and Node.js with Express.js for efficient backend operations.

Designed the UI/UX and implemented responsive, intuitive, and visually cohesive interfaces using custom CSS to provide a seamless job searching and management experience.

Tech Stack: React JS, Node/Express & MongoDB Local

Technical Skills

Programming Languages: Python, Java, JavaScript, Typescript, HTML, CSS, Kotlin & Dart.

Frameworks & Tools: Next JS, React JS, Vue JS, React Native, Expo, Node/Express JS, Django, Flutter, Tailwind CSS, ShadCN UI, Notion, Canva, Figma, Adobe Tools, Microsoft Tools, JIRA, Git, Github, Postman, VSCode IDE & Antigravity IDE

Databases: MongoDB, SQLite, Firebase, Supabase, NeonDB, PostgreSQL, & MySQL

Cloud Platforms: Azure, Google Cloud, Vercel, Render, Hostinger & Namecheap

Other Skills: Full-Stack Mobile & Web Development, UI/UX Design, Project Management & Team Leadership, API Design & Integration, Real-Time Features, AI Integration, Technical Documentation, Client Communication & Requirement Gathering, Problem Solving & Critical Thinking, Task Delegation & Workflow Optimization, Agile/Scrum Collaboration, Prompt Engineering & Responsive Web Design
